Please list any and all prescriptions/non prescription, any cosmetics, toiletries, and tanning accelerators.

DANGER – ULTRAVIOLET RADIATION

- ✚ Follow operator, tanning unit, eyewear and safety instructions.
- ✚ Avoid too frequent or lengthy exposure. As with natural sunlight, exposure to a sunlamp may cause eye and skin injury, sunburn and allergic reaction.
- ✚ Wear protective eyewear. **FAILURE TO USE PROTECTIVE EYEWEAR MAY RESULT IN SEVERE BURNS OR LONG-TERM INJURY TO THE EYES.**
- ✚ Abnormal or increased skin sensitivity or burning may be caused by certain foods, medications (including, but not limited to tranquilizers, diuretics, antibiotics, high blood pressure medication, birth control pills, and skin creams), cosmetics or toiletries. Consult a physician or pharmacist before using a sunlamp if you are using prescription or non-prescription medications, have a history of skin problems, or believe yourself especially sensitive to sunlight. Pregnant women and women on birth control pills who use a tanning device may develop discolored skin.
- ✚ Ultraviolet radiation from sunlamps enhances the effects of the sun. **DO NOT** sunbathe before or after exposure to ultraviolet radiation.
- ✚ If you do not tan in the sun you are unlikely to tan from the use of this product.
- ✚ Use of a tanning device may not provide a protective base in regards to sun exposure.

SEE OTHER SIDE

MEDICATION THAT MAY CAUSE SENSITIVITY TO SUNLIGHT

I. ANTIBIOTICS

A. Tetracycline's

1. Declomycin
2. Ledermycin
3. Vibramycin
4. Gantrisin
5. Midicel

B. Sulfonamides

1. Bactrim
2. Setpra
3. Gantanol
4. Gantrisin
5. Midicel

II. ANTICONVULSANTS

- A. Dilantin

III. ANTIEMETICS

- A. Compazine
B. Tore can

IV. ANTIFUNGALS

- A. Fulvicin (griseofulvin)
B. GrisPeg
